Value Proposition

Provide an app that helps people keep on staying fit and work out even efficiently.

Basic Problem

- How to help users record their training?
- How to make users stay motivated?
- How to provide users constructed information?

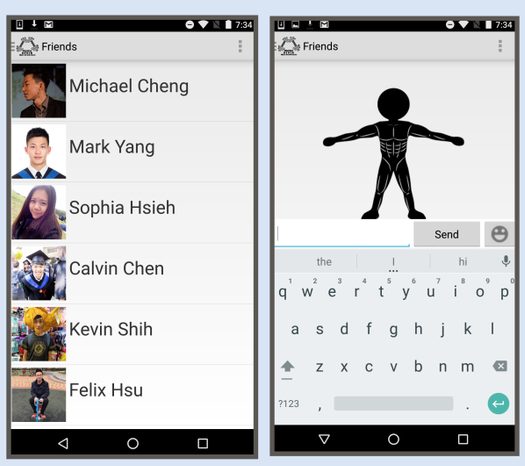
How We Solve It

- Record what they have done on specific day.
- Share body shape with their friends.
- Learn from tutorial videos and adjust their motion.

Key Features

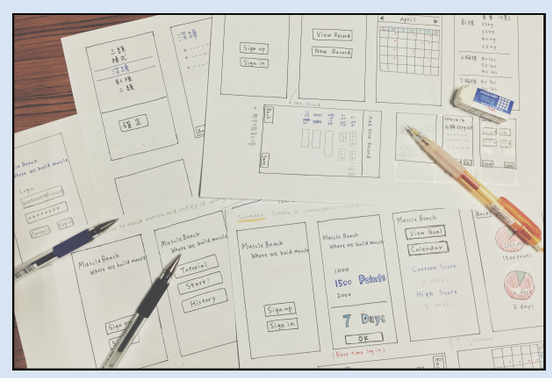
- **Body shape:**

- **Share with friends:**

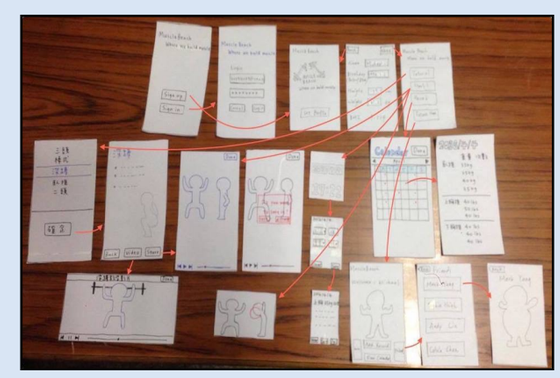


- **Figure and charts:**

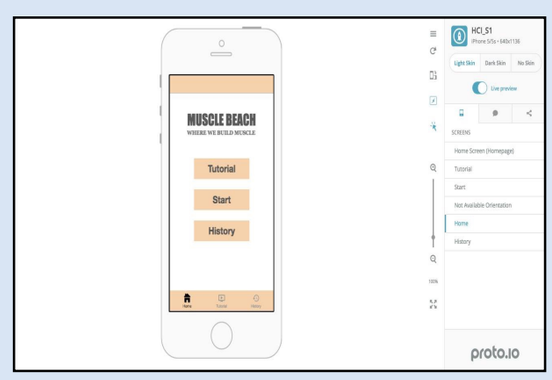
Design Iteration



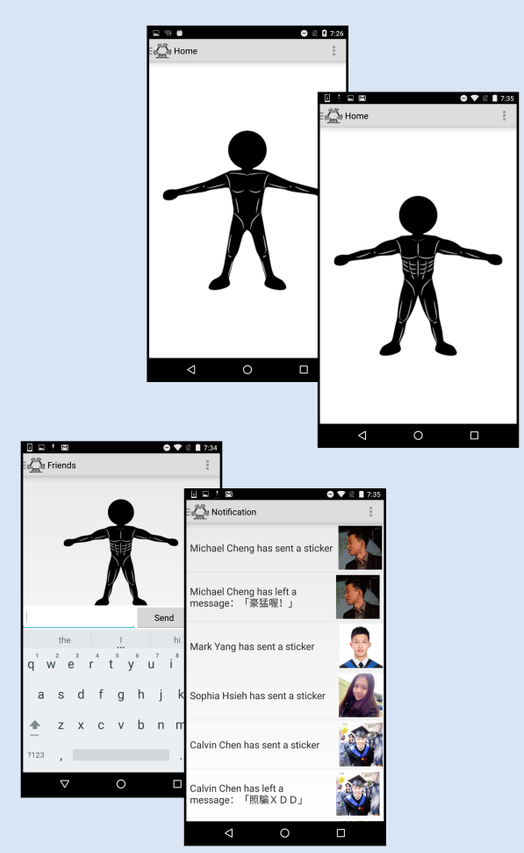
1 Experience Prototype



2 Low-fi Prototype



3 Medium-fi Prototype



4 High-fi Prototype
